“ Transform Your Fleet Management Today ”

What is Fleet Manager

Fleet manager puts you in command of your vehicle fleet nationwide, revolutionizing fueling operations and ensuring top tier security through advanced features.

Key Benefits

Realtime Transaction Access: Monitor transactions instantly for unparalleled transparency and control.

Enhanced Account Control: Manage vehicle purchases remotely with flexibility and ease. **Dynamic Route Management:** Adjust routes on the fly to optimize efficiency and responsiveness.

Critical Data Collection: Capture detailed vehicle usage data for strategic decision making. **Flexible Identification:** Choose secure identification methods tailored to your operational needs

NFC (Near Field Communication) Tag Key Benefits

Ease of Use: Customers can easily interact with your brand by tapping their smart phones on an NFC tag to access information, without needing an app or internet connection.

Enhanced Customer Experience: NFC tags can provide instant access to product details, reviews, or loyalty programs, making the customer journey smoother and more

Security: NFC technology is highly secure, making it a reliable option for contactless payments and secure data exchanges.

Mobile Fleet Drive Efficiency, Anytime, Anywhere.

What is Mobile-Fleet?

Mobile-Fleet revolutionizes fleet management with an ultramodern, cardless solution for swift and secure transactions within Meru Fleet Solutions. Fuel vehicles directly from your mobile device—no Fleet Cards, NFC, or RFID needed.

Key Features

Efficiency: Streamlined, cardless transactions and rapid order management for enhanced productivity.

Convenience: Use Permanent or Dynamic QR Codes or OTPs for

Pre-Ordering: Instantly create, change, or delete orders via the mobile app for real-time flexibility

Security: Ensure secure transactions with OTPs, QR Codes, and unique PINs for peace of mind.

Benefits

Timesaving: Simplify transactions and order management, saving valuable time for managers and drivers.

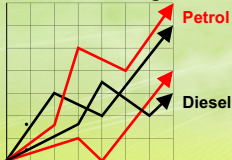

Convenience: Conduct mobile based transactions for unmatched onthego efficiency—no cards needed

Operational Efficiency: Streamline operations with seamless communication and management for enhanced productivity.

Security: Guarantee safe and authenticated transactions with advanced security measures.

Mobile-Fleet offers a secure, convenient, and highly efficient cardless solution for managing fleet transactions. Empower your fleet with mobile based fueling and order management, ensuring seamless operations anytime, anywhere.

Monitor Fuel Usage

You can Now Monitor Fuel Usage and you have total Control

Integrating Customer ERP (Enterprise Resource Planning) System

Significant Benefits For Large Fleet Operators

Seamless Fuel Management: The integration allows fleet operators to directly manage and monitor fuel consumption, purchases, and costs within their existing ERP systems. This provides real-time data synchronization, enhancing decision-making and operational efficiency.

Automated Reporting: Automated fuel usage and cost reporting reduce manual data entry, minimizing errors and saving time. Fleet operators can generate accurate, up-to-date reports directly from their ERP systems.

Enhanced Fleet Monitoring: Operators can track fuel usage per vehicle, monitor driver behavior, and optimize routes, all from their ERP dashboards. This leads to improved fleet efficiency and cost savings.

Compliance and Control: The integration ensures that all transactions are compliant with industry regulations, providing fleet operators with better control over their operations and adherence to legal requirements.

Features

Purchase Limits: Set precise fuel and product purchase limits for cost-effective management.

Station Selection: Optimize fueling locations based on sophisticated cost efficiency algorithms.

Vehicle Usage Insights: Track performance metrics like kmpl and distance traveled for optimal fleet performance.

Built in Security: Ensure transactions are secure with advanced security protocols.

Unified Management: Oversee all vehicles seamlessly under a single Customer ID for streamlined operations.
